OBJECTIVE

M.Tech Information Technology student at NIT Raipur with a strong foundation in Artificial Intelligence, Machine Learning, Data Analytics, and Full-Stack Web Development. Interested in applying technical and problem-solving skills to develop intelligent, data-driven, and scalable solutions.

EDUCATION

M.Tech in Information Technology, National Institute of Technology, Raipur — **2025 – Expected 2027**
CGPA: 8.87/10 — CG, India

B.Tech in Computer Science, JNTUA College of Engineering, Kalikiri — **2020 – 2024**
CGPA: 8.6/10 — AP, India

SKILLS

Programming Languages	C, Python, Java, JavaScript
Databases	MySQL, PostgreSQL
Web Technologies	React.js, Node.js, Express.js, Redux, CSS, JWT
CS Fundamentals	DSA, Operating Systems, Computer Networks, OOP, DBMS
AI, Machine Learning	PyTorch, Scikit-learn, XGBoost, NLP, Transformers

PROJECTS

AI Powered Resume Screening & Recommendation System — Python, NLP, Streamlit, Machine Learning, MySQL — code

- Developed an NLP-based resume screening system to parse PDF/DOCX resumes, extract relevant skills, and generate automated candidate evaluation reports.
- Built a recommendation engine providing personalized resume improvement, interview preparation, and role-based upskilling suggestions across **10+ job roles**.
- Integrated MySQL with an interactive analytics dashboard supporting candidate tracking, **2 export formats** (Excel/PDF), and experience- and role-based insights.

Spotify-Based Music Streaming Web App — React.js, Spotify API, JavaScript, REST API, OAuth — code

- Built a responsive music streaming application integrating the **Spotify Web API** for real-time track search, playlist retrieval, and playback control.
- Implemented secure **OAuth authentication** for personalized user access and session-based music streaming.
- Developed **5+ core features** including track search, playlist retrieval, playback control, user authentication, and dynamic track navigation using React state management.

VeriSense AI – AI-Powered Multilingual Multimodal Misinformation Detection Platform — React.js, Node.js, Python, Flask, NLP, Machine Learning, Whisper — code

- Developed a full-stack misinformation detection platform supporting **English, Hindi, and Telugu** across text, audio, and video inputs, generating REAL/FAKE verdicts with confidence scores and language detection.
- Built a multimodal processing pipeline using **FFmpeg and OpenAI Whisper** for audio/video transcription, with language-specific **TF-IDF + Logistic Regression** classifiers served through a Python Flask ML service.
- Implemented explainable predictions with **class probabilities, confidence levels, influential terms, transcript viewing, analysis history, and model performance insights** through a React-based responsive interface.
